Short bio

AnneMarie Maes is an artist who has been studying the close interactions and co-evolutions within urban ecosystems. Her research practice combines art and science, with a keen interest in DIY technologies and biotechnology. She works with a range of biological, digital and traditional media, including live organisms. Her artistic research is materialised in techno-organic objects that are inspired by factual/fictional stories; in artefacts that are a combination of digital fabrication and craftsmanship; in installations that reflect both the problem and the (possible) solution, in multispecies collaborations, in polymorphic forms and models created by eco-data. On the rooftop of her studio in Brussels (BE) she has created an open-air lab and experimental garden where she studies the processes that nature employs to create form. Her research provides an ongoing source of inspiration for her artworks. 'The Bee Agency' as well as 'the Laboratory for Form and Matter' and 'Sensorial Skins' - in which she experiments with bacteria and living textiles – provide a framework that has inspired a wide range of installations, sculptures, photography works, objects and books – all at the intersection of art, science and technology.

general Information

Born, Leuven, Belgium - 14 August 1955

website

<https://annemariemaes.net/>

education

Cultural Anthropology/ Documentary Film, Sound Image Culture (SIC), 2008-2009

Master Cultural Studies, Free University Brussels (VUB), 2001-2002

Master of Fine Arts, Luca School of Arts Brussels, 1998-2000

Bachelor Design, Luca School of Arts, 1974-1977

work

Independent artist 1997 to today

Founding director Pix & Motion film production 1986-2004

Founding director OKNO artist collective Brussels 2004-2016

Open BioLab Erasmus Hogeschool Brussels, teaching/workshops 2018

selected exhibitions (solo is indicated) after 2010

2023 Festival International de L'Histoire de L'Art, Chateau de Fontainebleau (Fr)

2023 Mateus Labs, Fondation Mateus Vila Real, Portugal (solo)

2023 ISEA23, group show Paris
